DETAILED ACTION

Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1-3, 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuo et al. (6,226,040).

Regarding clam 1, Kuo discloses a video converting apparatus showing a video receiving step (col. 8, lines 37-43), a processing step (201), a generating step (250), and a predetermined section or area rescaling step (231).

Regarding claims 2 and 3, Kuo indicates the selected area can be zoomed to any size (col. 4, lines 27-29).

Regarding claim 6, the input video in Kuo is inherently component video signal.

Regarding claims 7-9, the converting means 201 meets the claimed invention.

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuo et al. (6.226.040) in view of Sugirmori et al. (5.161.020).

Application/Control Number: 10/579,151

Art Unit: 2622

Regarding claim 4 and 5, Kuo does not disclose the analyzing and defining steps as claimed. Sugimori, from the similar field of endeavor, discloses a color character area determination means (Figure 2) for detecting areas where text are being displayed. This means meets the analyzing and defining steps as claimed. Kuo teaches that his invention can be used to enlarge selected text (col. 1, line 14). Therefore, in order to automatically select, enlarge, and display text information, such as the closed caption text, on the monitor, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to include the color area determination means of Sugimori into Kuo to perform the well known functions as claimed.

Conclusion

 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haffey et al. (6,396,962) shows a selected area magnifier.
